

Mission-Driven Digital Transformation at National Scale

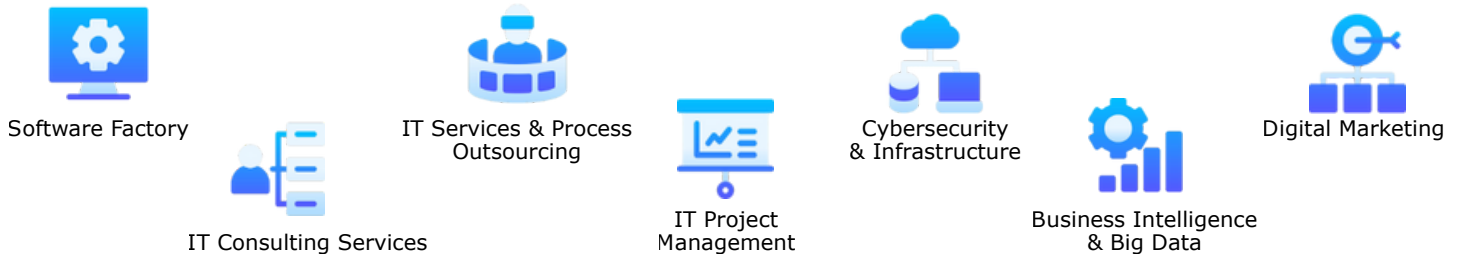

WHY LINKTIC OUR PURPOSE

We design platforms that governments depend on every day. From justice systems and healthcare to education and economic development, our solutions help institutions serve communities faster, more transparently, and with human dignity. We specialize in mission-critical environments where technology is not optional—it is essential for access, equity, trust, and operational continuity. We offer a government-ready delivery model aligned with State & Local procurement standards, security requirements, and SLA-driven operations.

WHAT WE DO

We deliver digital transformation, platform engineering, cloud services, and data solutions for public and regulated environments. Our work supports governments and enterprises in building resilient, secure, and people-centered systems at national scale. We combine deep engineering capabilities with operational excellence to modernize legacy environments, deploy high-availability platforms, and sustain long-term performance.

"We don't just build systems; we operate them with accountability for real-world results."

CORE COMPETENCIES

- Digital Platform Engineering (high-availability systems)
- Cloud Architecture & Migration (Gov & Regulated)
- Data Platforms & Analytics
- Cybersecurity & Compliance
- Legacy System Modernization
- Application Development & Systems Integration
- SLA-Driven Managed Services
- Secure Citizen-Facing Portals

IMPACT AT SCALE

Our platforms assist large public institutions and high-demand environments, allowing governments and enterprises to operate with improved efficiency, transparency, and social impact.

We develop systems that truly matter—where every transaction, each process, and every user experience directly influences people's daily lives.

IMPACT PILLARS

Justice & Transparency

Access to Healthcare & Public Services

- W-9 ready
- Vendor registered
- Audit-ready delivery model
- Secure SDLC practices
- Data protection & privacy controls
- SLA-driven operations

SELECTED IMPACT CASE STUDIES

Hellion – Telemedicine (Public Health)

Challenge: Expanded access to medical expertise, recognized through regional digital innovation awards.

Solution: Telehealth platform supporting remote care and specialist collaboration for public health networks.

Impact: Reduced travel barriers, improved response times, and expanded access to medical expertise—recognized in regional digital innovation awards.

Capabilities: Digital Platforms • Cloud • Data • Security

Fiduprevisora S.A. – Financial Core Modernization Program (Financial Sector)

Challenge: Modernize core fiduciary operations under strict regulatory and audit requirements.

Solution: Large-scale modular platform transformation to centralize workflows, integrate financial processes, and increase traceability.

Impact: Stronger operational control, improved auditability, and increased efficiency in critical fiduciary services.

Capabilities: Digital Platforms • Cloud • Data • Security

Judicial Branch – SIUGJ (Justice Platform)

Challenge: Modernize judicial case processing and citizen-facing services with secure digital workflows.

Solution: Delivered a digital judicial management ecosystem enabling electronic case handling and online services for external users.

Impact: Faster access to justice, improved transparency and traceability, and higher operational efficiency across judicial processes.

Capabilities: Digital Platforms • Cloud • Security

Additional Programs Include:

Digital Inclusion (Education) • Economic Development Platforms • Climate & Environmental Modernization

Past performance references and project validations are available upon request.
